

King County

Department of Natural Resources and Parks

Wastewater Treatment Division

Boeing Creek Trunk Sewer Replacement

OVERVIEW

- Built in the early 1960's
- Serves Ronald Wastewater District and Highlands Sewer District
- Total length: ~18,000 feet

NEED FOR PROJECT

- Sections of the sewer in poor condition and under capacity.
- During a recent storm, sewage backed up through a manhole into a garage, and into two basements
- Odor complaints from several locations.

PROPOSED WORK

- Replace 12,000 feet of sewer along the existing route
- Improve odor control
- Conduct most work in street right of ways

CONSTRUCTION IMPACTS

- Construct sewer in 200-foot sections.
- Dig open trench in streets in most areas.
- Relocate underground utilities as needed.
- Restore streets once construction is complete

PROPOSED SCHEDULE

- Design and permitting: through 2004
- Construction: 2005 – 2006
